

Solution Architecture

Date	8 July 2026
Team ID	SWETID-2026-5556
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

The system architecture is structured into a modular, multi-tiered framework designed to handle real-time automated processing.

Component Description Table:

Component Name	Description / Role in Architecture	Technologies Used
Auth Service	Manages user login and secure token validation.	JWT, OAuth2
Core Logic Service	Runs the machine learning models to assess credit card risk.	Python, Scikit-Learn
External API Integrations	Connects to third-party bureaus and automated messaging alerts.	REST APIs, Twilio
