

### Initial Project Planning Template

|               |                                 |
|---------------|---------------------------------|
| Date          | 8 July 2026                     |
| Team ID       | SWETID-2026-5556                |
| Project Name  | Credit Card Approval Prediction |
| Maximum Marks | 5 Marks                         |

### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

| Sprint   | Functional Requirement (Epic) | Use Story Number | Use Story/Task                                                                                                                              | Story Points | Priority | Team Members   | Sprint Start Date | Sprint End Date (Planned) |
|----------|-------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|----------------|-------------------|---------------------------|
| Sprint 1 | User Authentication           | USN-1            | As a user, I can register and log into the portal securely using my email and password to access the application dashboard.                 | 3            | High     | Tarini Jayasri | 1 July 2026       | 8 July 2026               |
| Sprint 1 | Data Ingestion                | USN-2            | As an applicant, I can fill out an online form with my financial details (income, employment, age) and upload background documents.         | 3            | High     | Tarini Jayasri | 1 July 2026       | 8 July 2026               |
| Sprint 2 | Model Pipeline                | USN-3            | As a system engine, I can pre-process the input data, handle missing values, and scale features to prepare it for the ML model.             | 5            | High     | Tarini Jayasri | 2 July 2026       | 10 July 2026              |
| Sprint 2 | ML Model Core                 | USN-4            | As a system engine, I want to execute the trained classification model to evaluate the applicant's profile and predict credit default risk. | 5            | High     | Tarini Jayasri | 2 July 2026       | 10 July 2026              |
| Sprint 3 | Core Logic Service            | USN-5            | As a backend system, I can trigger external API connections to pull mock third-party credit scores and run automated validation checks.     | 3            | Medium   | Tarini Jayasri | 3 July 2026       | 12 July 2026              |
| Sprint 3 | Result Delivery               | USN-6            | As a user, I can view an interactive dashboard displaying my instant credit card approval status, risk metrics, and application breakdown.  | 3            | Medium   | Tarini Jayasri | 3 July 2026       | 12 July 2026              |
