

Communication

Date	11 July 2026
Team ID	SWETID-2026-5556
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Marks

Communication Plan:

S No	Communication Type	Frequency	Channel/ Tool	Participants	Purpose
1	Team Stand-up	Daily	Telegram	Team Members	Track daily progress on Flask routing and UI design, and sync on immediate tasks.
2	Progress Update	Weekly	Git-hub	Team Members	Review working modules of the data web form and double-check code integration.
3	Issue/Bug Discussion	As Needed	Telegram Group	Affected Developers	Debug system crashes, syntax errors, or issues with color-coded CSS banners.
4	Peer Review	Bi-Weekly	Microsoft Teams	Team Members	Evaluate milestones like local server stability, dataset handling, and project documentation together.
5	Final Demo Rehearsal	Once	Google Meet	Team Members	Dry run the complete application walkthrough video and double-check submission checklists.

Communication Challenges & Resolutions:

S No	Challenge Faced	Resolution/Action Taken
1	Misaligned frontend and backend parameters: The form fields on the UI weren't correctly matching the keys expected by the Flask backend /predict endpoint, causing errors.	Held an unscheduled bug discussion via Discord to explicitly map out parameter names between index.html and app.py.
2	Scheduling tracking conflicts: Team members had overlapping class hours and exam schedules, making it hard to find common sync times.	Moved daily stand-ups to a dedicated WhatsApp group where members could leave text/voice updates asynchronously at their convenience.
3	Vague understanding of threshold limits: Disagreements arose on what parameters should trigger a low-risk vs high-risk (fraudulent) flag without outside guidance.	Set up a collaborative team review session to look at sample credit metrics and collectively finalize the classification logic rules.
