

Demonstration of Proposed Features

Date	11 July 2026
Team ID	SWETID-2026-5556
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Marks

Demonstration of Proposed Features:

S No	Feature Name	Description	Status (Implemented/Partial/Pending)	Demonstrated (Yes/No)	Remarks
1	Interactive Input Dashboard	A clean HTML web form allowing users to submit financial data like credit scores and income levels seamlessly.	Implemented	Yes	Fully functional interface with native form validation constraints.
2	Dynamic Risk Classifier Engine	Backend Python logic inside app.py that processes input parameters against defined low-risk and high-risk safety boundaries.	Implemented	Yes	Accurately processes conditional parameters without lagging.
3	Visual Status Alerts	Dynamic CSS-styled response layouts that render high-contrast, color-coded components (Green for Safe, Red for High-Risk).	Implemented	Yes	Instantly responds upon form submission to alert the user visually.
4	Parameter Range Guard	Validation rules that block invalid inputs (such as negative income or empty text values) to ensure backend service security.	Implemented	Yes	Prevents backend routing errors by displaying inline alerts.

Feature Implementation Summary:

Metric	Value
Total Features Proposed	4
Total Features Implemented	4
Total Features Demonstrated	4
Overall Implementation Rate (%)	100%
